DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The applicant is noted that: (i) the IDS filed on 11/5/03 has been considered by the examiner; however, the reference "EPO Search Report dated 8/21/03", listed under section NON PATENT LITERATURE DOCUMENTS, is not initialed by the examiner because it is not considered as a prior art; and (ii) regarding to the IDS filed on 12/16/03, the reference "AD/DA Converter and Digital Filter", listed under section NON PATENT LITERATURE DOCUMENTS, is not considered because the examiner has not received a copy of English translation of the reference. The applicant is now requested to provide a copy of English translation of the reference.

Drawings

3. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2631

5. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 recites the limitations "the fraction elimination means" and "said integrator". These limitation are lack of antecedent basis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 11 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Karema et al (5,248,972).

As per claim 11, see figure 4, and col. 5, line 7 to col. 6, line 10, Karema et al discloses a delta-sigma modulator comprising:

-- a plurality of integrators (H_1, \dots, H_n); and

order variance means (41, 42) for varying effective orders increasing due to connection with a plurality of said integrators (see col. 5, lines 37-51).

As per claim 12, Karema et al discloses means ($a_m, 21_n, a_1, 21_2$) for eliminating a fraction of signal outputted from integrators (H_3, H_1).

Allowable Subject Matter

8. Claims 1-10 are allowed.

Art Unit: 2631

Conclusion

9. References (5,248,971), (5,805,093), (6,075,820) and (5,075,679) are additionally cited because they are pertinent to the claimed invention.
